

Geiger Counter

A mealtime hunt that's fun for the whole family

- ◆ While everyone is still seated at the dinner table ask a family member to leave the room. While he or she is gone chose an object to hide and then hide it nearby.
- ◆ For example, hide a bottle of catsup or salad dressing, a candle, a fork, knife or spoon, or a cup.
- ◆ When your family member returns explain that he must find the object that has been hidden.
- ◆ He will receive “help” from other family members who make ticking sounds like a Geiger Counter, the farther away from the object, the slower the ticking, the nearer to the object that your family member gets, the faster the ticking.
- ◆ Play until the object is found.

ParentTip: Always think safety when doing this or any other family activity.
